

Features

- Travel to 400mm
- Optional rotary encoder resolution to 0.25 micron
- 10 kg payload capacity
- Servo and step motor options
- Limit sensors
- 40mm tall single axis, 80mm tall XY stack
- English and Metric optical breadboard compatible.
- All stages tested for specification compliance

Overview

Primatics PCL40 Series linear positioning stages are our most compact precision ballscrew linear stages. Ideal for applications such as automated microscope inspection, medical assembly and semiconductor wafer inspection. The PCL40 allows the user to fit a standard product into their most space constrained applications.

NEMA 17 In-Line Motor Mount

The PCL40 accepts standard English NEMA 17-frame motors. The motor does not extend below the bottom face so a PCL40 can be mounted directly to a flat surface. An accessory adapter enables a NEMA 23 motor to be mounted in place of a NEMA 17.

Motors and Encoders

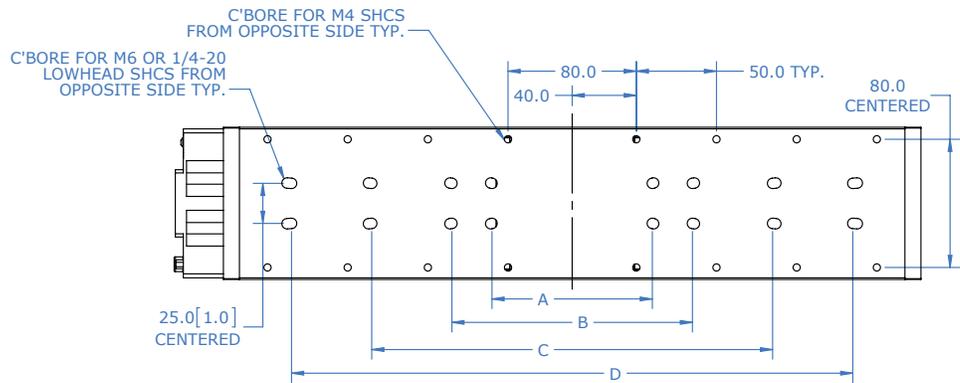

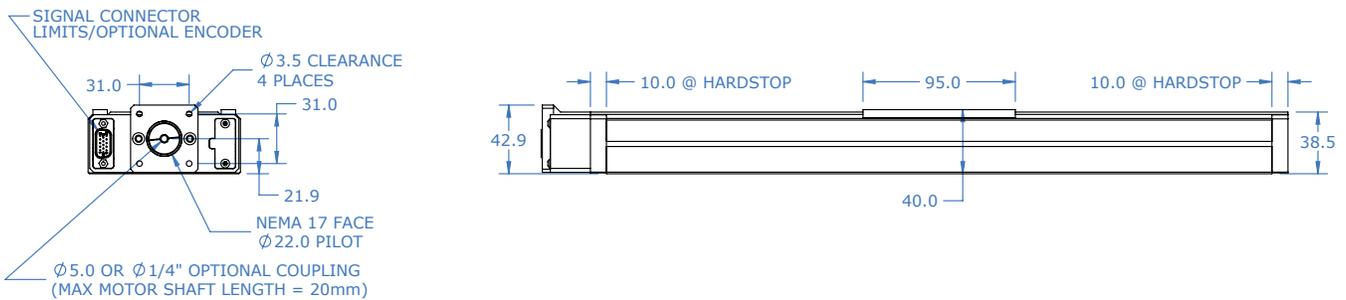

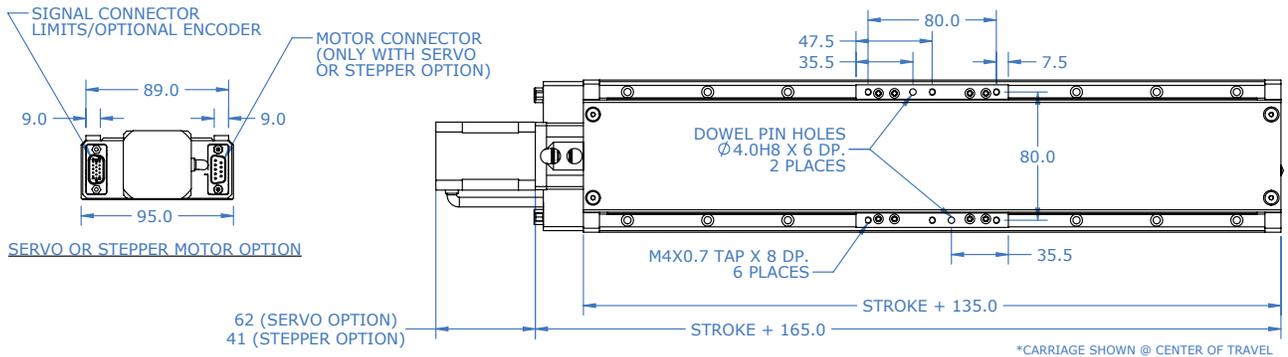

The PCL40 can be configured with a servo or step motor. The servo motor option uses the internally mounted rotary encoder with resolutions to 0.25um. The stepper motor configuration can be run open loop or with an internal rotary encoder for close loop operation. The internal encoder affords a short overall length.

XY Stacking and Breadboard Mounting

Two PCL40s can be directly stacked in an XY configuration without the need of an adaptor plate. The total stack height is just 80mm. The PCL40 Series can be directly mounted to either an English or Metric pattern optical breadboard without the use of adapters. An optional English or Metric tabletop is also available for the mounting of lab equipment to the stage.

Accessories

Model	Description
CABLE-PCL40-ENC-SENSORS	Cable assembly for limits, home and encoder connector. Un-terminated at user end. 12ft standard.
CABLE-PCL40-STEP MOTOR	Motor cable assembly for use with M1-2 option. Un-terminated at user end. 12ft standard.
CABLE-PCL40-SERVO MOTOR	Motor cable assembly for use with M1-3 option. Un-terminated at user end. 12ft standard.
CABLE-PCL40-SERVO-ADAPTER	Cable assembly for use with M1-3 Servo Motor option. Terminated with circular 26pin connector. 3ft. length.
PCL40-Z-BRACKET	For mounting PCL40-0050 or PCL40-0100 in vertical orientation.
PCL40-TABLETOP-ENGLISH	Machined plate used with PCL40 with english mounting pattern. Fasteners to mount Tabletop to PCL40 are included.
PCL40-TABLETOP-METRIC	Machined plate used with PCL40 with metric mounting pattern. Fasteners to mount Tabletop to PCL40 are included.
PCL40-NEMA23-MOTOR-ADAPTER	Adapter plate for using NEMA23 motor with PCL40 in-line motor mount option. Note the plate and motor will extend below the bottom of the stage.
PCL40-NEMA17 INLINE 5mm SPACER	Use with NEMA17 motors with shafts longer than 20mm.
